MEP Sylvia Limmer
MEP Ivan Sincic
MEP Christine Anderson
MEP Ryszard Legutko

Dear Brave Members of the European Parliament,

We are a small active team of Finnish medical doctors, specialists, academically qualified experts and independent researchers who have been attempting to stop the corona vaccinations in Finland -- for more information, see <https://childrenshealthdefense.eu/eu-issues/lets-save-the-finnish-children-campaign/>.

We have been following with great interest and expectations your efforts to stop the vaccination of the citizens of Europe with experimental mRNA injections. We are supportive and grateful for the work you have done to protect our health.

In the event that you may wish to avail yourself of our expertise in your pursuit of your extremely important work, we enclose our contact information at the end of this letter.

In the event that you may be interested to talk to the Finnish MEPs with whom we recently have been in contact, we enclose their names at the end of this letter.

Some of our Finnish team members have lost their jobs for defending the independence of science. Others have chosen to protect their jobs and income by working anonymously for *Let's Save the Children of Finland*. To date, only independent or retired experts have been able to freely speak out using their names and faces.

We have raised questions on the efficacy, safety and quality of COVID-19 vaccines with the leading health officials both in Finland and Europe.

Their descriptions of the methods used by health officials to ensure the efficacy and safety of these vaccines do not constitute scientifically meaningful answers

The unscientific answers that we have received from our Finnish and European health officials fail to address our scientific justifications for discontinuing mRNA injections in Finland. The scientifically sound information our team members have presented has been labelled "misinformation".

For our correspondence with the EMA please see:

<https://pelastetaansuomenlapset.fi/wp-content/uploads/2022/10/EMAn-vastaus-26.11.21-1.pdf>

<https://pelastetaansuomenlapset.fi/wp-content/uploads/2022/10/EMA-vastaus-3.-PSL-kirjeeseen-21.10.2022.pdf>

In our efforts to draw the attention of our colleagues and citizens to the possible serious effects of these experimental injections, we have written letters to our members of parliament as well as other policy makers in Finland, given interviews to alternate media journalists, held speeches at rallies, and published articles on our home page.

The coming together of silenced experts, independent clinicians, scientists and other experts, as well as MEPs will help assure the success of scientific truth.

The defense of the independence of science calls upon us to unite.

On behalf of the medical doctors and researchers of the campaign *Let's Save the Children of Finland*

Yours sincerely,

Rauli Mäkelä MD
Espoo, Finland
